

## Rose Petal Joints

Yes, you can buy these, but why not try making your loved one a few Rose Petal Joints. Sniffing the aromatic scent of ganja may be one of life's best little pleasures, but if you add the light floral scent of a rose, cannabis has never smelled sweeter.

### How to Roll a Rose Blunt

Collect some rose petals. Grab a cookie sheet and line three petals on the pan, overlapping them. Set your oven to broil and put the pan in for ten seconds. The flower petals will appear darker once removed. Lick the bottom of the flower petal to make it sticky and arrange into an overlapping row. Set your oven to broil once again, heating the petals once more for ten seconds. After taking it out of the oven, let the petal papers rest for a few minutes. This resting period will help them to firm up.

Grind up your bud very fine and place it into the middle of your homemade rose petal papers. Begin rolling it very tightly, starting at the spot on the papers at the bottom of the petals. Though the petals should already stick together to seal up the rose petal blunt, place it once again on the pan. Put the oven back on broil and place the pan on the bottom shelf for ten more seconds.

Let your rose blunt masterpiece set for about two minutes, then sit back and enjoy! Or place it in an empty heart-shaped candy box, and tuck it under your loved one's pillow.
